

Redesign the Misleading Colored Chart

R.No: 32 Reg. No: 192424278 Name: SHEIK MOHAMMED AFNAN A

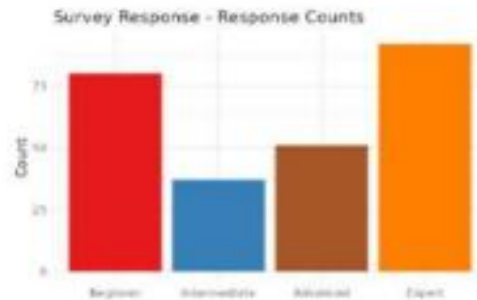

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

1. What is this chart trying to show?
2. What's wrong with the color choice?
3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?
2. What's wrong with the color choice?
3. Propose a better color scheme (describe it in words):

Chart 1:

1. What is the chart trying to show?

It shows the number of students who passed and failed in each group.

2. What's wrong with the color choice?

The colors green and red can be confusing and may be difficult for people with color-vision deficiencies to distinguish.

3. Better color scheme:

Use blue → pass

orange → fail

With clear labels and good contrast.

Chart 2:

1. What is the chart trying to show?

It shows the number of survey responses from Beginner, Intermediate, Advanced and Expert participants.

2. What's wrong with color choice?

The bars use many unrelated bright colors, which can distract from the data and make comparison less consistent.

3. Better color scheme:

Use one consistent color for all bars, or use a single-color gradient from light to dark to show the categories clearly.
